### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the claimed invention with a semiconductor enclosed drying space supplied with a solvent vapor and sensing either a solvent vapor temperature or solvent vapor concentration with the feature of at least one of selectively heating in response to the determined solvent concentration at least one of at least a portion of one of the solvent vapor source, the at least one solvent vapor supply line, and at the drying space to alter the solvent vapor concentration in the drying space or at least one solvent vapor supply line comprising a gas flow rate controller disposed for carrying the solvent vapor from the solvent vapor source to the vapor drying space wherein the at least one gas supply line includes at least one supply line heating element for heating at least a portion of the at least one gas supply line and at least one gas supply line temperature sensor for sensing a gas supply line temperature is not found in the prior art either singly or in combination. The closest prior art reference is considered Komino et al. (US 6,134,807) in view of Bergman (US 6,357,142) which teaches IPA flow regulation and temperature sensing respectively. The considered patentably distinct feature is found in each of independent claims 1 and 16. Other prior art references cited with this action teach one or more elements of the claimed invention, but lack the motivation to combine those references with the closest prior art in order to obviate the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 3749

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Gravini whose telephone number is 571 272 4875. The examiner can normally be reached on normal weekday business hours (east coast time).
